# Chapter C13 Practice: Angular Momentum 

Physics I
College of the Atlantic

1. You are standing at point X . A 0.5 kg bird at point A files due north at $2 \mathrm{~m} / \mathrm{s}$. What is the bird's angular momentum with respect to you?
2. You are standing at point X . A 0.5 kg bird at point B files due north at $2 \mathrm{~m} / \mathrm{s}$. What is the bird's angular momentum with respect to you?
3. You are standing at point X . A 0.5 kg bird at point B files at 37 degrees east of north at $2 \mathrm{~m} / \mathrm{s}$. What is the bird's angular momentum with respect to you?
4. A merry-go-round with a mass of 100 kg and a radius of 1.5 meters rotates at a rate of 1.5 revolutions every second. What is its angular momentum?
